

## CrystalClear® PondTint®

*Tints Water Brilliant Blue · Prevents Photosynthesis · Safe For All Wildlife*

Designed to tint pond water an attractive blue, PondTint® shades the water to keep photosynthesis from occurring which keeps algae blooms in check.

PondTint® can be used in all temperatures of water and should stay effective for 2–3 weeks depending upon environmental factors (rain, run-off, irrigation).

PondTint® is 100% safe for fish and plants, non-caustic and does not require an applicators license to use. Ponds using PondTint® can be used for irrigation. PondTint® will stain clothing.
